Genome and Transcriptome Database of *Temnopleurus reevesii*

Genome and Transcriptome Database of *Temnopleurus reevesii* and larvae. This species will be an excellent model organisms in biology. The web site provides information on *T. reevesii* genome and transcriptome for a wide range of biologists.

WestPac-SUGDB

Western Pacific Sea Urchin Genome Database

Genome and Transcriptome database of sea urchins in the West Pacific,
Hemicentrotus pulcherrimus and *Temnopleurus reevesii*

<i>Hemicentrotus pulcherrimus</i>	<i>Temnopleurus reevesii</i>
 <p><i>Hemicentrotus pulcherrimus</i> (A. Agassiz, 1845)</p> <p><i>Hemicentrotus pulcherrimus</i> is a species of sea urchin in the family Centrotestudinidae. It is found in the Western Pacific Ocean, including Japan, Korea, and the Philippines. The genome of <i>H. pulcherrimus</i> has been sequenced and is available in the WestPac-SUGDB database.</p>	 <p><i>Temnopleurus reevesii</i> (A. Agassiz, 1845)</p> <p><i>Temnopleurus reevesii</i> is a species of sea urchin in the family Centrotestudinidae. It is found in the Western Pacific Ocean, including Japan, Korea, and the Philippines. The genome of <i>T. reevesii</i> has been sequenced and is available in the WestPac-SUGDB database.</p>
