

Doctoral Thesis Presentation

Studies on the Use of Persimmon Peel for Ruminant Feeds

Speaker : Ainissya Fitri

Graduate School of Biosphere Science

Date and time: 15:30-16:30, July 30, 2020

Place: Room C316, School of Applied Biological Science

In order to use persimmon peel as a local byproduct feed for ruminant animals, the change of nutritional values during ensiling process and effects on ruminal fermentation, ruminal methane production and nutrient digestibility were assessed by in vitro and in vivo experiments, focusing on tannin and protein fractions in persimmon peel .
