(1) Name of Lecturer: Victor Poupet

(2) Position: Associate Professor

(3) Affiliation: Université de Montpellier 2

(4) Short Biography: Victor Poupet is a researcher at the Laboratoire d'informatique, robotique et micro-électronique de Montpellier (LIRMM). His research topics include decidability and complexity problems on

used in a much broader range of applications (object-oriented programming and the model-view-controller architecture for instance).

The slides and all the examples presented during the lecture were made available for the students as a reference. A homework assignment was also given to the students to evaluate their understanding of the contents of the lecture.
