

HIRAKU-Global

Annual Conference FY2023

“Sharing experiences and honing skills: The progression of the HIRAKU-Global Researchers through FY2023”

Seminar “Science Communication”

Instructor: Irina FILONOVA, PhD, PCC (professional certified coach)
the phd whisperer CEO & Associate Fellow, Japan Science and Technology Agency (JST)

Online Event (via Zoom Webinar) / To be conducted in English

The HIRAKU-Global Program (funded by the “Strategic Professional Development Program for Young Researchers” (FY2019-2028)) aims to develop researchers who can “manage their own laboratory, train students, collaborate with domestic and international researchers from various fields, hone their own research senses, and lead unique research in the world”. This fiscal year, the eight 2nd Cohort HIRAKU-Global Researchers (HGRs) who were selected in FY2021 have partaken in and received a mid-term evaluation from the HIRAKU-Global Program, and as a result, have been reflecting on their past research activities and reviewing their future goals and action plans. Therefore, within this event, the 2nd Cohort of HGRs will outline how they will make further strides towards becoming world-class researchers by presenting upon their research vision and future plans. They will also receive comments from their experienced mentors. Following the presentations, a seminar on the topic of “Science Communication” will be presented by Dr. Irina FILONOVA, PhD, PCC.

February 22

2024 (Thu)

10:00 – 15:55 JST
