広島大学大学院国際協力研究科

文部科学省科学技術振興調整費戦略的環境リーダー育成拠点形成プログラム「低炭素社会を設計する国際環境リーダー育成」始動

New Project on Global Environmental Leader Education
Program for Designing a Low-Carbon Society with the
Support of the MEXT Special Coordination Funds

開発技術講座 藤原 章正

Development Technology Fujiwara, Akimasa

IDEC は、2003 年度から 2007 年度まで 5 年間、21 世紀 COE プログラム「社会的環境管理能力の形成と国際協力拠点」(リーダー：中越信和)を実施し、インドネシアをはじめ研究対象国における能力形成のプロセスおよび能力と社会経済的背景、環境パフォーマンスとの関係を解明する

environmental policies can be formulated for nations that receive aid: policies that enhance capacity by taking into account the stage of development of such nations and their distinguishing features.

From FY2008 to FY2012, Hiroshima International Center for Environmental Cooperation (HICEC), Hiroshima university, will, with the support of the MEXT Special Coordination Funds for Promotion of Science and Technology, will be engaged in the Training of Global Environmental Leaders for a Low Carbon Society. The primary focus will be on the issue of global warming and the achievement of a low-carbon society. Such an achievement requires addressing five areas: urban system design to prevent global warming; wise use of biomass resources; environmental impact assessment; policy and international design; and environmental education. Our aim is to have developing countries work hand in hand with Japan in training international environmental leaders, a task which we will undertake in a more effective manner.

To achieve the above goal, we will establish an international environmental program to produce 12 masters and 6 doctoral graduates every year, selected

strategically both in Japan and developing countries, as leaders who can plan for a low-carbon society. Moreover, we will institute parallel programs for the ongoing education of the graduates by promoting joint researches based on local areas having more research achievements fed back into new teaching materials. Such efforts will help create a global human resources network spanning various nations and fields of inquiry, and bring about an international system of knowledge that advances the frontline of international cooperation. In turn, this will promote partnership between developed and developing nations in addressing issues that demand a truly global response.

「国際協力特定プログラム」現地研修
(インドネシア・フィリピン)を実施
Report of Field Work on "International Cooperation
Specific Program (Indonesia and Philippine)"

IDEC 支援室 原田 妙子

General Affairs Group of IDEC Harada, Taeko

IDEC では、今年度から学部 3 年次生を対象に「国際協力特定プログラム」を実施している。このプログラムに登録し前期に講義 4 科目のうち 2 科目以上を履修した学生は、「現地研修」に参加する。講義で得た知識をもとに実際に途上国を訪れ、国際協力の現場・途上国の現状を知ingことを目的として、今年度は 8 月にインドネシア（平和協力）およびフィリピン（教育協力）の 2 コースを実施した。

インドネシアコースは、上杉准教授およびガジャマダ大学講師の引率のもと、2005 年に和平合意が実現したアチエを訪問した。International Organization for Migration 訪問や Aceh Peace Generation の学生との交流などにより紛争後の平和構築の実際を学ぶとともに、津波の被災地を訪問し復興の状況を視察した。中でも本コースに同行し感じたのは、紛争や津波で親を亡くした子どもたちが通う寄宿学校での経験が、学生にとって非常に大きかったことである。「夢を絵で表現してもらおう」というテーマで行った教育実習、子どもたちとの共同生活、広島・原爆のプレゼン、先生方との意見交換・・・すべてにおいて学生は楽しみながらも真剣に取り組み、わずか数日の間に大きく成長する姿を見ることができた。受入先の先生方からも、学校に対する誇りとともに、教育内容・授業方法・クラス運営などについて日本の考え方を学び活かしたいという気持ちが強く感じられ、双方にとって非常に実りのある研修となった。

フィリピンコースは、池田研究科長・清水准教授の引率で、NISMED、JICA、ADB、スモーキーマウンテン、コレヒドール島などを訪問した。学生たちは、実際に自分の目で現状を見たり援助関係者から話を聞くことで、研修前に持っていた途上国に対するイメージとのギャップ、途上

国の中での格差、歴史認識の違い、教育分野での国際協力の重要性などを感じたようである。「自分の考え方や価値観が揺らぐほどの経験ができた」、「途上国の発展には現地で働くだけではなく様々な方面から携われるということを再認識した」、「国際協力に少しでも貢献できる研究になるようテーマを見つめ直したい」等の感想があり、貴重な経験となったことが伺える。

研究科の特色ある取組の一つとして本プログラムを継続していくために、来年度の研修内容や実施体制等が検討されている。各種手続き・危機管理・学生への情報提供などにおいても、今年度の経験を踏まえ、より効果的にサポートできるようにしたい。

IDEC, started to execute "International Cooperation Specific Program" for the third-year undergraduate students in Hiroshima University from this academic year (from April 2008). The students who registered and took two courses among four for this program in first semester, can participate the field work. For the purpose of learning the reality of international cooperation in developing countries by visiting there, IDEC prepared two courses for the field works this year (Aug. 2008), that is, Indonesia ("peace" course) and Philippine ("education" course).

In Indonesia course, led by Assoc. Prof. Uesugi and a Lecturer of Gadjah Mada University (Indonesia), the participants visited Aceh region which parties to the conflict realized the peace agreement in 2005 after the durable violent conflict. The party to Aceh visited International Organization for Migration (IOM) and also interacted with students of Aceh Peace Generation for learning the post-conflict peacebuilding and seeing the situation of reconstruction after Tsunami in 2004. I also felt that the students received deep impact from their experiences in visiting the boarding school which the orphans present. Through the events, for example, joint class on "expressing your dream by picture," living together with children, presentation on Hiroshima (A-bomb), exchanging views with teachers and so on, the students addressed these events seriously and I suppose they enhanced their capacity in spite of the scarce days. This trip was also fruitful for teachers in Aceh in terms of knowing the way of thinking of Japan on the contents and formation of our education system.

On the other hand, in Philippine course, the participants visited NISMED, JICA, ADB, the area of "Smokey Mountain," Corregidor Island and so on, led by Prof. Ikeda (Dean) and Assoc. Prof. Shimizu. The students for the course also felt many things on gaps between their previous images and reality of developing country. The gap especially came up from the differences among the people living inside developing country on

the economic level of their lives. The student learnt the importance of international cooperation in the field of education. They had the comments as followings; "I experienced so much with reversing my sense of value," "I realized we can support the development for developing countries through multiple ways," "I wanted to pursue how to contribute international cooperation through my advanced research."

IDEC still try to continue and develop this program, an important pillar of IDEC program, for next year as well. I myself try to support effectively for the coming program with my experience in this year.

教育文化講座 平川ゼミの紹介
Introducing the Hirakawa Seminar

教育文化講座 平川 幸子

Educational Development and Cultural and Regional Studies

Hirakawa, Yukiko

平川研は、現在 21 人の学生を擁する大きな研究室です。日本人 9 人、留学生 12 人で、留学生は 4 つの国から来て

います。日本人も、9 人のうち 7 人が様々な発展途上国で活動した経験があります。公用語は英語。我が研究室のモットーは、High expectation (志を高く) Hard working (労を惜みず) Helping each other(助け合う)です。学生は、皆、高い期待を胸に、2 D (Dream and Deadline)(夢と締切)の日々を送っています。日本人は、原則として発展途上国でフィールド調査を行い、その結果を基に修士論文を書くことになっています。その結果、一期生から 7 年で、4 人の JICA 専門家、2 人の調整員を送り出しました。一方、公務員、教員など堅実な仕事に就いている人もいます。これまで修了時に進路がない人を一人も出さなかったと先生は偉そうですが、実は学生の努力の賜物。先生は嫌味を言っていただけとか。

Hirakawa Lab is a large lab with 21 students: nine Japanese and twelve foreign students. Foreign students come from four different countries and seven out of nine Japanese students have experience of doing various activities in developing countries. So, the official language of our lab is English. The mottoes of our lab are "High expectation", "Hard working" and "Helping each other". Having high expectation on ourselves, we are living the days of two Ds: Dream and Deadlines. All students are expected to do field research in their countries or other developing countries, and write a thesis based on the results. In seven years, six Japanese graduates found job in the field of international cooperation. Many foreign students are also doing good job after going back to their countries. The advisor is very proud of the graduates, but some says that she did not do much. All the honorable fruits are born by students' hard work, and the advisor was just pushing them by "provocative" and "stimulus" words.

The 154th IDEC Asia Seminar

講師 Speaker:

Mr. Fujio Iwaki (Project Manager, Hiroshima Industrial Promotion Organization) and Dr. Takehumi Mokudai (Assoc. Professor, Tohoku Gakuin University)

演題 Title:

“ Modularization and Electronics Technologies in Automotive Industry ”

日時 Date: July 15, 2008

We hold the Seminar on “ Modularization and Electronics Technologies in Automotive Industry ” in IDEC and had 18 participants. We had two speakers as a joint lecture. They explained on the related issues, future problems on cutting-edge regional makers, and future engagement to

automotive industries of developing countries under their prominent careers. Following their lecture, proactive discussions were conducted. (Coordinator: Tatsuo Kimbara)

The 155th IDEC Asia Seminar

講師 Speaker:

Prof. Nirmal M. Tuladhar (Visiting Professor, ASAFS, Kyoto University and Professor, Centre for Nepal and Asian Studies Tribhuvan University, Nepal)

演題 Title:

Multilingual Education in the Nepalese Context

日時 Date: July 11, 2008

Professor Tuladhar, also a member of the special committee tasked to formulate the policy on multilingual education for the republican government of Nepal delivered the seminar. He shared the latest information on the reality of multiethnic society and the urgent need of the multilingual education, anticipated difficulties and possible solutions for fair human and societal development in Nepal. The discussion was vibrant and the keen participants included scholars from University of Tokyo, Museum of Ethnology, Osaka and faculty members of other graduate schools, in addition to IDEC staff and students. (Coordinator: K. L. Maharjan)

The 156th IDEC Asia Seminar

講師 Speaker:

Dr. Pancha N Maharjan (Associate Professor, Centre for Nepal and Asian Studies Tribhuvan University, Nepal)

演題 Title:

Peace Building in Nepal: from Comprehensive Peace Agreement to Constituent Assembly Elections

日時 Date: July 14, 2008

Dr. Maharjan delivered the seminar on the peace building issues of new republican Nepal with updated information on the outcome of the constituent assembly election and its aftermath. Participants, including faculty members and students of other graduate schools, IDEC

Jakarta Area”

日時 Date: April 24, 2008

Dr. Delinom began the discussion on the relationship between urbanization and changes in groundwater systems, and focused on groundwater situation of Greater Jakarta area. Jakarta still continues to increase its consumption of groundwater for domestic and industrial needs. Massive groundwater abstraction has caused lowering of groundwater levels and land subsidence, a situation which damages infrastructures and worsens the impact of flooding in coastal areas. Dr. Delinom concluded the lecture by providing strategic measures to strengthen groundwater resources management in Jakarta. The seminar was also enhanced by discussions led by Prof. Takao Yamashita on modeling approaches to water resources management in Indonesia, and Dr. Shinji Kaneko on people's awareness of flood risks in the coastal area of Jakarta. This seminar was attended by 40 participants. (Coordinator: Shinji Kaneko)

The 158th IDEC Asia Seminar

講師 Speaker:

Prof. Magnus Larson, Lund University, Sweden

演題 Title:

Coastal Inlets: Processes and Mathematics Modeling

日時 Date: 13:30-15:00, August 1, 2008

Prof. Magus Larson is a famous Coastal Engineer in European nations, especially in the field of coastal morphology study. He gave us an interesting talk on the topic of “Coastal Inlets: Processes and Mathematical Modeling”, where the observational study on coastal currents, waves sediment transport mechanism near the coastal inlets together with their mathematical formulations had mainly been introduced. Possible coastal inlets protection measures were also introduced and the related environmental impact to coastal community were discussed in the seminar. IDEC-Lund University research collaboration in the GELs Program was discussed and student exchange plan was proposed. (Coordinator: Takao Yamashita)

The 159th IDEC Asia Seminar

講師 Speakers:

- 1) Dr. Bouasavanh Keovilay (Dean, Faculty of Letters, National University of Laos)
- 2) Mr. Ketkeo Phagthanivong (Head, Department of English, Faculty of Letters, National University of Laos)
- 3) Mr. Bouangeune Souvannasy
- 4) Ms. Latsanyphone Soulignavong
- 5) Dr. Kazuaki Tsuido

演題 Title:

Problems and Perspectives of the Department of English, National University of Laos Policy for Further Improvement of the Curriculum

日時 Date: September 24, 2008

Three papers were presented in this seminar. Dr. Bouasavanh and Mr. Ketkeo introduced the present situation of the Department of English in the Faculty of Education. The Faculty of Letters is the Center of language education in Laos, and is expected to provide the society with human resources who can work in foreign languages. The Department of English is one of eight departments and the number of students is increasing drastically. Then, Mr. Bouangeune and Ms. Latsanyphone presented that the experimental teaching held from 2006 to 2008, based on the new structural curriculum was successful in developing student achievement. Finally, Dr. Tsuido introduced English education in Hiroshima University. (Coordinator: Yukiko Hirakawa)

The 160th IDEC Asia Seminar

講師 Speaker:

Professor Shedly N. Tjandra (University of Indonesia)

演題 Title:

Interdiscipline Studies in Masters 'Theses of Hiroshima

日時 Date: November 4, 2008

C. K. Lal who has been regularly writing for Nepal Times without rest for about 20 years gave credit to the Nepali people for the peaceful transformation of the country. He then pointed out crucial issues that will determine future peace and stability of Nepal. Features for federal system that would need intelligently delicate treatment is one of them discussed deeply by the participants. Lal with his insight knowledge of concurrent political unfoldings shared information in a simple way from the simple ones to the complicated issues asked by the students. Participants profoundly content benefited much from the seminar. (Coordinator: K. L. Maharjan)

The 162nd IDEC Asia Seminar

講師 Speaker:

Mohammad Noor Akbary, Member of House of Representative (Afghanistan Parliament)

演題 Title:

Peacebuilding in Afghanistan

日時 Date: Wednesday, 12th November 2008

(Summary/up to 100 words)

Mr. Hohammad Noor Akbary who has an extensive diplomatic background is a prominent member of the international affairs committee of the House of Representative in the Afghanistan Parliament. He has provided us with an overview of the country and presented the current security situation and political challenges in Afghanistan. His presentation was followed by a brief presentation on the evaluation of the Disarmament, Demobilization and Reintegration process by Shams Shamsul Hadi, a doctoral student of IDEC. After the presentations, insensitive discussion with the audience continued on the possibility of envisaging a new political framework and reconciliation among the government and anti-government elements. (Coordinator: Yuji Uesugi)

The 163rd IDEC Asia Seminar

講師 Speaker:

Michael MENAKER Ph.D. (Commonwealth Professor, The Department of Biology, University of Virginia)

演題 Title:

“ The Biological Clock: Its role in health, diseases, and the Global Environment ”

日時 Date: November 12, 2008

Prof. Menaker explained that all living things have inside them clock mechanisms that have evolved to synchronize them with rhythms in the environment, in particular with the daily and annual cycles. Furthermore,

in mammals (and humans) there is a brain center which we call the “master clock”. However every cell and organ also has its own clock and in order for the animal to function properly each of these many clocks must work together. Prof. Menaker made concluding remarks that links findings from Chronobiology with various environment issues, such as global warming, reduction of biodiversity and agricultural problems. This seminar was attended by 30 participants. (Coordinator: Shinji Kaneko)
